compounds listed above. These properties are in the new ASPEN PLUS INHSPCD (In-house Pure Component Database) and are enclosed as inputs to DFMS (Data File Management System) (Appendix A) and as ASPEN PLUS Input language PROP-DATA statements (Appendix B). (All properties are in SI units.)

Development of an ASPEN PLUS Physical Property Database ...

The Aspen Plus(®) model was further used to consider the combustion of the produced pyrolysis oil (bio-oil) in the existing boilers that generate hot water for space heating at the Equine Center. The model results show the potential for both the equine facility and the College to displace diesel fuel (fossil) with renewable pyrolysis oil and alleviate a costly waste disposal problem.
