The Canon EF is a manual focus 35mm single-lens reflex camera produced by Canon between 1973 and 1978. It was compatible with Canon's FD-mount lenses. The EF was built as an electronic version of Canon's top-of-the line F-1 camera. Because of this, the EF shares the F-1's rugged construction and tough metal body.

### Canon EOS lens Adapters - Using Manual focus lenses on ...

Like all STM lenses, the EF 50mm f/1.8 STM is an electronic, or focus by wire lens. This means that there is no direct connection between the manual focus ring and the focusing elements in the lens. Moreover, the AF ring rotates indefinitely in either direction with no change in resistance when the lens stops focusing.

Manual Focus Recommended for Non-Global Vision Lenses "For interchangeable lenses which are not from the Contemporary, Art or Sports lines, using MF is recommended, since it may be difficult to...

### Sigma Shares Caveats for Using Its EF Lenses on the Canon ...

Hello. I recently got an EF 50mm 1.8 lens for my EOS 60D. The automatic focus appears to be fine but turning the focus ring while in manual does not change focus at all. I've made sure that the lens is set to "MF" and I can see "M FOCUS" on my top display. I tried the lens on another camera and it behaves the same way.

### Solved: EF 50mm 1.8 Manual Focus not Responding - Canon ...

Twist the FOCUS ring (the tip of the lens) all the way to one side (extend it). You may hear a click noise or two, this is good, but don't FORCE the lens. Twist the FOCUS ring all the way to the opposite side (retract it).

Ef-S The Super Precision Matte focusing screen is optimized for wide-aperture lenses from f/1.8 thru f/2.8. Areas that are slightly out of focus appear more out of focus, making it easier to tell when focus is right-on. It is ideal for users who frequently use manual focus in dim light with fast lenses.
