By switching to clean energy across our supply chain, we can erase the majority of that footprint. Since 2015, Apple's Supplier Clean Energy Program has helped our manufacturing suppliers transition to renewable electricity generated from solar, wind and other renewable projects. And by 2030, all our products will be made with 100% clean energy.

The natural environment or natural world encompasses all living and non-living things occurring naturally, meaning in this case not artificial.The term is most often applied to the Earth or some parts of Earth. This environment encompasses the interaction of all living species, climate, weather and natural resources that affect human survival and economic activity.

Natural environment - Wikipedia

Thus, after the binding energy has been removed, binding energy = mass change $\times c^2$. This energy is a measure of the forces that hold the nucleons together. It represents energy that must be resupplied from the environment for the nucleus to be broken up into individual nucleons.

Binding energy - Wikipedia
