Photoelectric Smoke Detectors. Occasionally, you will walk into a store and a bell will go off as you cross the threshold. If you look, you will often notice that a photo beam detector is being used. Near the door on one side of the store is a light (either a white light and a lens or a low-power laser), and on the other side is a photodetector that can "see" the light.

### Smoke Alarm FAQ | FirstAlertStore.com

Alarm contacts are rated for a maximum voltage of 60 V, SELV (Safety Extra Low Voltage) and a maximum continuous current of 0.5A. Connection and mounting torque requirements are listed in Table 6. Heat dissipation greater than the objectives listed in GR-63-CORE may occur. Additional equipment room cooling may be required.

### Installation Manual - Eltek

• When mounting an alarm on the ceiling, locate it at a minimum of 4" (10 cm) from the side wall. • When mounting the alarm on the wall, use an inside wall with the top edge of the alarm at a minimum of 4" (10 cm) and a maximum of 32" (30.5 cm) below the ceiling. • Put smoke alarms at both ends of a bedroom hallway or large room if the
