For many paper folding projects, you need to start with a square piece of paper with four equal sides. Most of the paper you have laying around, however, is probably rectangular. Luckily, there are two easy ways to turn a rectangle into a square without using a ruler. If you have two equal sheets of paper, you can even do it without folds.

**How to Make a Square from Rectangular Paper: 8 Steps**
To build square corners with the 3-4-5 rule, first measure 3 units from the corner on 1 side. Turn in a perpendicular direction from the first line and measure 4 units. Then, measure the diagonal between the ends of your 2 lines. If it measures 5 units, your corner is square.
