Oesterle, Logic: The Art of Defining and Reasoning, 2nd ...

Taking reason in its broadest sense, so as to include all the operations of the mind which are strictly cognitive, namely, the formation of mental images, judgment, and ratiocination, we may expand St. Thomas' definition and define logic as "the science and art which so directs the mind in the process of reasoning and subsidiary processes as to enable it to attain clearness (or order), consistency, and validity in those processes". Logic is essentially directive.

9780135399996 - Logic The Art of Defining and Reasoning ...

The distinguishing characteristic of logic (the art of non-contradictory identification) indicates the nature of the actions (actions of consciousness required to achieve a correct identification) and their goal (knowledge)—while omitting the length, complexity or specific steps of the process of logical inference, as well as the nature of the particular cognitive problem involved in any given instance of using logic.

—Ayn Rand Lexicon

The definition of logic is a science that studies the principles of correct reasoning. An example of logic is deducing that two truths imply a third truth. An example of logic is the process of coming to the conclusion of who stole a cookie based on who was in the room at the time.

LOGIC | 29 Definitions of Logic - YourDictionary

The definition of art itself is as follows: $\exists Z \exists Y (\text{Art iff } (Z \vee Y))$, where (a) Z and Y, formed from properties on Gaut's cluster list, are either non-empty conjunctions or non-empty disjunctions of conjunctions or individual properties; (b) there is some indeterminacy over exactly which disjuncts are sufficient; (c) Z does not entail Y and Y does not entail Z; (d) Z does not entail Art and Y does not entail Art.
