The above procedure can also be performed with the MFI pump still mounted on the Porsche. However, prior to removal of the drive belt for the pump, the injection timing must be set for the end of delivery stroke (F-E mark on the crankshaft pulley) in relation to the set mark on the pump drive cog shaft.

Porsche 911 Bosch Mechanical Fuel Injection Overview | 911 ...

Setting up or tuning this pump is a laborious procedure. It is described in the Porsche publication #4532.20 (and #4532.21) entitled "Mechanical Fuel Injection check,measure,adjust." Basically this Porsche publication has a ten point checklist for setting up the Bosch pump: 1. Air cleaner element. 2. Compression loss and leakdown. 3.

911 mechanical fuel injection set up

The MFI system consists of two main parts, the injection/distribution pump, and the throttle bodies. The electric fuel pump located in the front of the car supplies pressurized fuel to the injection/distribution pump. The injection pump is the heart of the system, and is responsible for metering and providing the fuel to each cylinder.
