Once you commit to moving to manual mode, you will find it's not difficult to manage. There are only three settings you need to work with to manually control your exposure - shutter speed, aperture, and ISO. These regulate the exposure. The exposure meter, also known as the light meter, guides your decision making.

Manual mode gives you total control. It is tempting to let the camera control all of the settings. Not only do you not learn anything, the camera will capture using settings it feels is right, not what you want. When we talk about settings, we are looking at the exposure triangle. We will look at this in greater depth later on in the article.
